DETAILED ACTION

This is a re-restriction of the claims. The Examiner mistakenly included claim 39 in Group I. Claim 39 should be in Group II. The Examiner apologizes for any inconvenience.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, 9-20, 35-38, drawn to a process for production of plasmid DNA.

Group II, claim(s) 21-27 and 39, drawn to a method for selecting a highly productive clonal subtype of a strain of *E. coli*.

Group III, claim(s) 28-29, 31, drawn to a method for selecting a highly productive clonal subtype of a strain of *E. coli*.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature is selecting a highly productive clonal subtype of a strain of *E. coli*. This element cannot be a special technical feature under PCT Rule 13.2 because the element is shown in the prior art.

The claims lack unity of invention because Applicants' invention is not novel. Chen et al (IDS reference A, especially pages 43 and 44) teach a fed-batch fermentation process for *E. coli* that produces a total yield of 10-fold the plasmid DNA as compared to manual fed-batch fermentation with the same plasmid transformed into the same *E. coli* strain. Therefore claim 1 is anticipated by Chen et al.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
